Priča prati dramu mještana i rudara rudnika ugljena „Šikulje“ kod Lukavca (riječ je o poslovima opasnim po život i na rubu zakona). Akteri u ovom svakodnevnom ratu su tzv. ćumuraši - ljudi koji krađu ugljen iz voza u pokretu i, s druge strane, radnici rudnika i željeznice koji prevoze ugljen i brinu se za sigurnost ljudi i tereta.

This is a documentary film that is occupied with the subject of risky way of making money for living; people, their destinies and circumstances that made them to "manage" in this way in order to survive. The story follows the drama of the local people and workers of "Šikulje" coal-mine near Lukavac. (The word is about life threatening jobs and on the edge of law.) The protagonists in this daily war are so called coal people - people who steal coal from moving train, and on the other side workers at the mine and railway, who transport coal and take care of the safety of the people and cargo.
